

**DEPARTMENT OF THE NAVY
NAVAL INTELLIGENCE COMMAND**

4600 SILVER HILL ROAD
WASHINGTON, D.C. 20389

⑦
IN REPLY REFER TO
NAVINTCOMINST 5430.4B
NIC-OOQ
1 November 1979

NAVINTCOM INSTRUCTION 5430.4B

From: Commander, Naval Intelligence Command

Subj: Intelligence Communications Planning and Management Responsibilities; assignment of

1. Purpose. To promulgate information concerning the assignment of Intelligence Communications Planning and Management responsibilities within the Naval Intelligence Command.

2. Cancellation. NAVINTCOMINST 5430.4A

3. Discussion. Previous communications management realignments have resulted in the consolidation of Program Elements 31056 (SPINTCOMM) and 31057 (Intelligence Communications, Other) into P.E. 31056 (Intelligence Communications). In view of the inherent advantages of conducting ADP and communications planning and management within a single organizational element, the Assistant to the Commander, Naval Intelligence Command for Processing Systems (NIC-OOQ) is assigned telecommunications planning and management responsibilities for the Commander, Naval Intelligence Command. Additionally, due to the close relationship between P.E. 31056 and P.E. 31028 (Defense Special Security System), NIC-OOQ coordinates with the Assistant Commander for Security (NIC-04) in programming and budgeting the Navy portion of P.E. 31028. Special Security policy and personnel clearance functions remain under the cognizance of NIC-04.

4. Definitions. To assist the addressees in determining the funding separations between Program Elements 31028 and 31056, the following definitions are provided:

a. P.E. 31028 (Defense Special Security System (DSSS)) - All resources necessary for the administration, security and management of compartmented programs, as well as for control and dissemination of compartmented intelligence and related information. This includes personnel who administratively support an intelligence communications function, but who do not operate or supervise the operation of communications equipment as a primary duty. Supplies used in the duplication of compartmented intelligence, including paper, properly fall within this program element.

1 November 1979

b. P.E. 31056 (Intelligence Communications (INTELCOMM)) - All resources necessary for the development, procurement, operation and maintenance of the Special Intelligence Communications (SPINTCOMM) network and other telecommunications used primarily to transmit Special Intelligence and collateral information and certain sensitive and privacy information to and between intelligence organizations.

(1) Specifically included are:

(a) Leased costs of AUTODIN/DSSCS switched network access lines, other intelligence communications circuits and rental terminal equipment, including installation costs.

(b) Procurement of government owned telecommunications terminal devices and communications equipment including processors used as switching and distribution devices, and spaces and supplies for those devices.

(c) Manpower and associated costs for terminal operation, maintenance, control and direction, excluding personnel at switched network facilities operated under the Communications Services Industrial Fund (CSIF).

(d) IDHS communications devices and services required for communications between IDHS computer sites and between computers and remote users. (For purposes of this definition, a user or device is termed "remote" normally when located outside the physical security perimeter within which the computer system resides).

(e) Non-record telecommunications facilities for the exchange of intelligence information, such as OPSCOMM circuits.

(f) INTELCOMM facility engineering, planning, installation/deinstallation and testing costs.

(2) Specifically excluded are:

(a) COMSEC resources (P.E. 33401)

(b) Switched network backbone costs (P.E. 33126)

(c) DSSS (P.E. 31028)

(d) Cryptologic Communications (P.E. 31055)

1 November 1979

(e) Telecommunications systems which are primarily dedicated to and programmed for other military purposes, but which are shared by intelligence users.

5. Responsibilities. The Assistant to the Commander, Naval Intelligence Command for Processing Systems (NIC-OOQ) is responsible to the Commander, Naval Intelligence Command for the following functions:

a. Serve as command point of contact for Naval Intelligence telecommunications matters.

b. Collect, evaluate, establish priorities and initiate validation/programming action in support of Naval Intelligence telecommunications requirements, including secure voice requirements.

c. Develop and prepare plans for the implementation of Naval Intelligence telecommunications systems and terminals to satisfy validated requirements, ensuring maximum cost effectiveness, and compatibility with other Intelligence Community and DoD telecommunications systems where necessary.

d. Review annual requirement documents and prepare planning, programming and budgeting (PPB) actions relating to Intelligence Communications - Navy (P.E. 31056N).

e. Prepare PPB documents relating to the Navy portion of the Defense Special Security System (P.E. 31028N).

f. Ensure the implementation of approved telecommunication plans through close coordination with other involved commands and agencies, primarily COMNAVELEXSYSCOM, COMNAVTELCOM, COMNAV-SECGRU, DIA and DIRNSA.

g. Provide to controlling commands, the personnel and dollar resources for the operation and maintenance of existing and newly implemented Naval Intelligence telecommunications systems, facilities and terminals, and Defense Special Security System facilities.

h. Monitor Naval Intelligence telecommunications systems, facilities and terminal performance, effecting improvements as necessary and feasible within resource, circuitry, equipment, manpower and training constraints.

i. Assist authorized commands in maintaining adequate telecommunications support, including security classmarking, alternate message routing, and the provision of communications publications and Communications Security (COMSEC) materials.

NAVINTCOMINST 5430.4B

1 November 1979

j. Manage NAVINTCOM participation in intelligence community multi-user telecommunications systems as required to support DoD and Naval Intelligence requirements.

k. Manage the Department of the Navy Special Intelligence Communications (SPINTCOMM) CRITIC Test Program.

l. Study and promote the interface of Intelligence Communications systems with common user (General Service), intelligence hosts and command and control ADP systems, as necessary to support DoD and Naval Intelligence requirements.

m. Participate in the review and revision of JCS and other DoD planning and policy documents concerning intelligence telecommunications.

n. Maintain liaison with other services, commands, agencies and the private sector on telecommunications matters related to or impacting upon the Naval Intelligence Community.

6. Action. Addressees are requested to disseminate the contents of this instruction to all concerned, and to address all correspondence pertaining to the areas of responsibilities outlined in paragraph 5 above to COMNAVINTCOM (NIC-OOQ).

E. A. BURKHALTER
